

Suryadatta National School at NASA

Kudos to Tapaswini Sharma student of Std X at Suryadatta National School participated in the prestigious NASA Space Settlement Design Contest-2017 in the INDIVIDUAL category. From over 6000 project entries from across the globe Tapaswini's project Kirithra Orbis won the Honorable Mention Award at the Competition. The Annual contest, co-operated by NASA Ames Research Center, San Jose State University, and the National Space Society (NSS) is world wide and in various categories. With support and encouragement from the school Tapaswini Sharma developed Kirthera -her space settlement design as a honeycomb shaped space settlement which aims to help humanity dive further into space. This spaceship can house people in thousands as it's citizens. It's structure helps it to become efficient and occupy maximum volume for minimum area. The space settlement uses only alternate sources of energy to perform basic and complex tasks required for human survival. It is made for space exploration along with economic stability. Tapaswini has been invited by NASA to attend the 36rd annual International Space Development Conference (ISDC) in St. Louis, USA. where she will be attending all the special activities planned for contestants. The Chairman of the school Dr. Sanjay Chordiya congratulated Tapaswini on her brilliant Achievement. Suryadatta National School while providing world Class education to the students also encourages them to develop creative and lateral thinking. The Students regularly participate in Competitions at National and International Level. Well done Tapaswini ! Well done Suryadatta National school !
